

Rapid, Scalable, 24/7 Support to Keep Your Crews Safe and Restore Services Fast

When storms strike, every minute counts. AWP Safety partners with your teams to keep operations safe and efficient—assessing impacts, managing traffic and work zones, coordinating tasks, and supporting recovery—so you can restore services quickly and safely while minimizing downtime and protecting your crews, customers, and the public.

Why Utilities Choose AWP Safety

- **Base Camp Coordination:** Staging areas, traffic control, and work zone management
- **Technology-Enabled Oversight:** Tablets, dashboards, GPS tracking, real-time reporting
- **Safety-First Approach:** Professionally trained crews, certified flaggers, standardized procedures
- **Utility Integration:** A single point of contact for scheduling and operational alignment

Comprehensive Storm & Emergency Services

We help Utilities manage:

- Power outages & downed assets
- Wire-down response & hazard protection
- Water main breaks & gas leaks
- Flooding & environmental spills
- Snow & ice storms
- Traffic accidents
- Site security & work zone protection

How We Support Your Operations

From pre-storm planning to post-storm recovery, AWP Safety coordinates every step to keep your crews safe and your operations moving:

- **Patrol & Assessment:** Local crews evaluate impact, secure critical infrastructure, and respond to “wire down” calls
- **Traffic & Roadway Management:** Flagging, detours, and parking flow
- **Storm Task Coordination:** Central scheduling and dispatch support for your teams and subcontractors
- **On-Site Management:** AWP Safety Manager ensures smooth operations and compliance with local requirements
- **LEO & Stakeholder Coordination:** Direct interface with law enforcement and local agencies
- **Pre-Storm Planning & Preparedness:** Map critical infrastructure, identify staging areas, plan contingencies
- **Post-Storm Recovery & Reporting:** Debris removal, site audits, incident documentation, and recommendations

Technology & Innovation

Leverage technology to stay connected and in control:

- Real-time visibility of crews, equipment, and work zones
- GPS tracking of vehicles and field resources
- Streamlined communication with your storm command teams
- Automated reporting and analytics for post-storm evaluation

Customer Benefits

- Protect your crews, the public, and critical infrastructure during emergencies
- Maintain safe work zones that enable your teams to restore utility services quickly
- Ensure regulatory compliance with detailed documentation
- Reduce operational disruption through professional coordination
- Access local expertise supported by scalable national resources
